SATURDAY SUBJECT TEST & ANALYSIS PROTOCOL

[ ] 08:15 - 09:45: Subject Test #1 Execution (LA 20M + GA Verbal 10M = 30M). Strict CBT conditions.
[ ] 10:00 - 12:00: 5-Step Analysis Protocol Execution:
- Step 1: Fill Score Table by Sub-Topic & calculate accuracy %
- Step 2: Classify Errors -> Cat A (Concept) | Cat B (Silly) | Cat C (Time) | Cat D (Misread)
- Step 3: Write Error Log entries for Cat A & B errors
- Step 4: Rework all wrong questions closed-book (Failed again = DOUBLE RED STAR)
- Step 5: Write single-sentence Weekly Diagnosis in Error Log

SUNDAY AUDIT & RECOVERY CHECKLIST

[ ] 08:00 - 09:00: Full-Week Memory Dump (Write ALL Linear Algebra properties from memory on blank A4)
[ ] 09:00 - 10:00: Error Log Pattern Review (Re-read week's errors -> Write Pattern Alert)
[ ] 10:00 - 10:30: Weekly Goal Audit (Verify 80+ PYQs, 4 Short Note pages completed)
[ ] 10:30 - 11:00: Week 2 Setup (Bookmark Calculus & GA Quant topics, tape schedule to desk)
[ ] 11:00 - 05:00: MANDATORY REST (Offline brain recovery -- NO study allowed)

GATE ECE 2027 -- WEEK 1 COMMAND CENTER

STANDARD OPERATING PROCEDURES (SOP) CHEAT SHEET

SOP 0: Energy Check: Green (Alert) = Full plan | Yellow (Tired) = PYQ problem solving focus | Red (Exhausted) = Emergency Protocol.
SOP 1: Deep Work: Phone in other room. Single window. Timer on desk. Distraction card. 10-min break: walk, water, stretch.
SOP 2: Theory (AM): Min 0-20 Scan (1.5x, no notes) -> Min 20-40 Example Attack (cover solution) -> Min 40-50 Raw Scratch & "Can I teach it?".
SOP 3: 3-Pass PYQ: Pass 1 (3 min Solo) -> Pass 2 (+1 min Short Notes) -> Pass 3 (+2 min Line 1 Hint). Pass 3 = RED STAR.
SOP 3.5: Red Re-Attempt: Re-attempt RED STAR questions closed-book 2 days later at 07:40 AM. Fail = DOUBLE RED STAR.
SOP 4: Short Notes: Max 1 side A4 per sub-topic (3:30 PM block). Formulas (blue) + Properties (black) + Cases (green) + TRAPS (red).
SOP 5: Active Recall: 20-min Warm-up (07:40 AM) + 45-min Evening Drill (08:00 PM) -> Blank-sheet dump + Red-Pen audit.
SOP 6: Error Log: 3 Lines for RED questions (08:45 PM): 1. The Trap | 2. My Error (honest) | 3. The Rule for future self.
SOP 7.5: Pre-Sleep: 5-minute slow read of today's Short Notes in bed (09:15 PM). Exploits REM memory consolidation.

CONTINGENCY PROTOCOLS (WHEN THINGS BREAK)

- Overslept < 1 hr: Compress breaks to 5 min, skip GA theory (do GA PYQs only).
- Overslept 1-2 hrs: Cut GA block. Shift Active Recall to 08:00 PM as normal.
- Lost 3+ hrs: Execute Minimum Viable Day (Theory + PYQ Block 1 + Short Notes + Error Log = 3.5 hrs).
- Red Energy Day: Sleep until awake. Do 1 hr PYQs + 30 min Error Log + 15 min Short Notes (1.75 hrs total).

THE 5 NON-NEGOTIABLE RULES

1. NEVER start a block asking "What do I do now?" (Desk prepped at 09:15 PM night before).
2. NEVER spend >6 minutes on a single PYQ (Enforce 3-Pass Rule SOP 3).
3. NEVER skip the Error Log (Quality error analysis beats sheer volume).
4. NEVER skip Sunday rest (Offline downtime consolidates long-term memory).
5. NEVER skip your 2.5-hour workout block (BDNF & cortisol control are critical for focus).
